FUNNEL VELOCITY ANALYSIS

B2B Marketing Investment & Pipeline Model

Prepared for **Nick**

Mine

March 21, 2026

STRATEGNIK

EXECUTIVE SUMMARY

$6.0M
ARR Goal

$1.4M
Projected Revenue

$3.2M
Total Investment

Q4 2026
First Revenue

-58%
ROI

Beyond modeled range
Crossover Quarter

UNIT ECONOMICS

2.8:1
LTV:CAC Ratio

36 mo
CAC Payback

$2.39
New CAC Ratio

KEY METRICS

$4K
True CPL (Fully Loaded)

$239K
Effective CAC

134 days
Current Sales Velocity

33 days
Days Saved vs Baseline

KEY INSIGHT

First revenue arrives at Q4 2026 after a 2-quarter investment period. Sales velocity has improved by 33 days through sustained targeting.

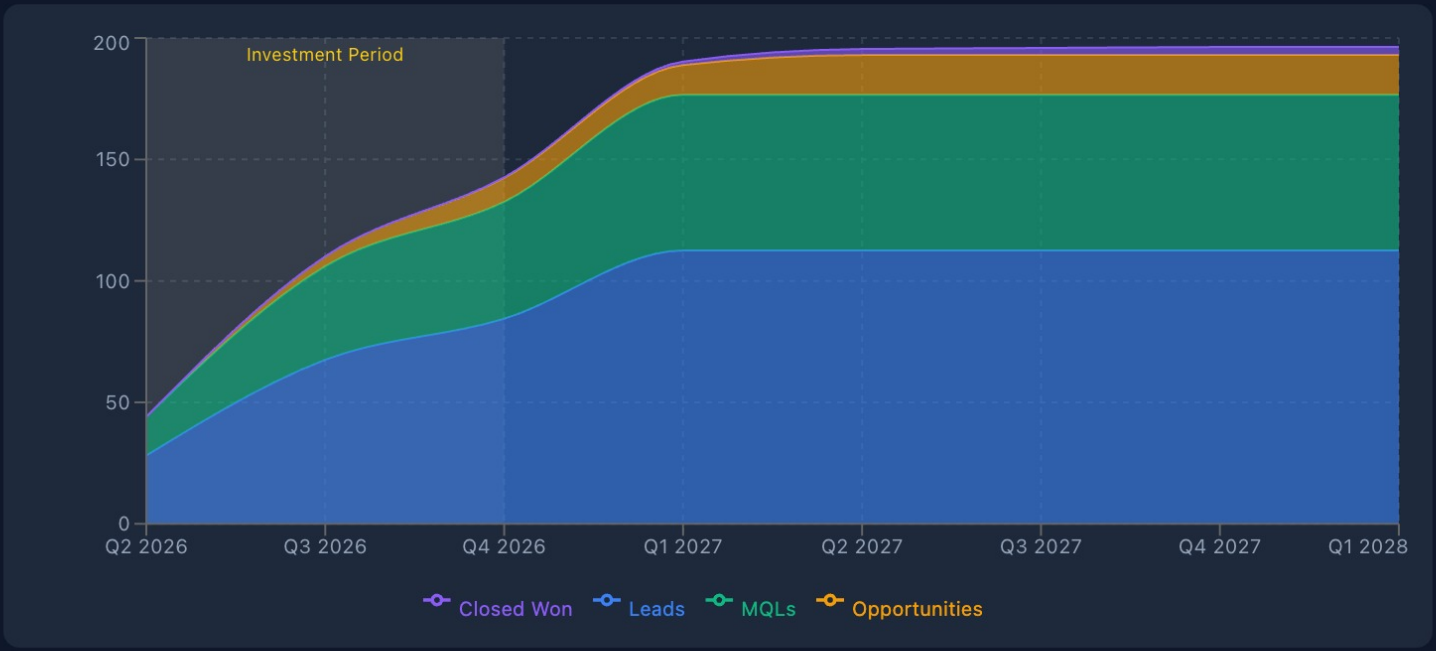
PROGRAM CONFIGURATION

1 cohort | 8 quarter horizon | ASP: $100K | ABM: 12,346 accts

STRATEGNIK

TIMELINE

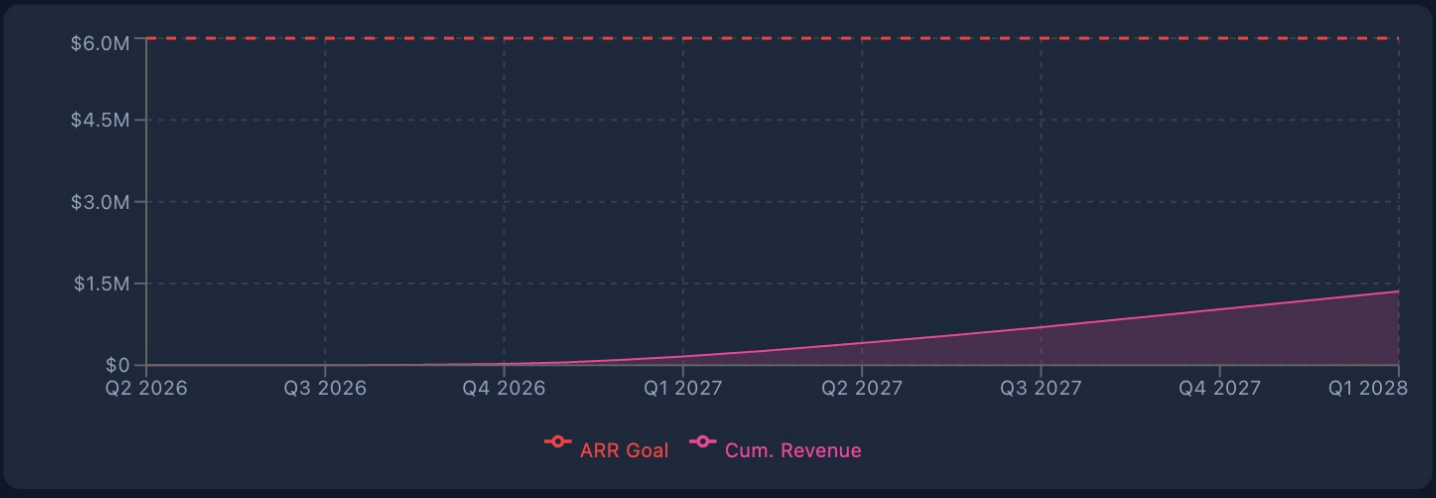
FUNNEL VOLUME BY QUARTER



CONVERSION RATES

15%	60%	27%	20%
Account to Lead	Lead to MQL	MQL to Opportunity	Opportunity to Close

CUMULATIVE REVENUE VS. GOAL

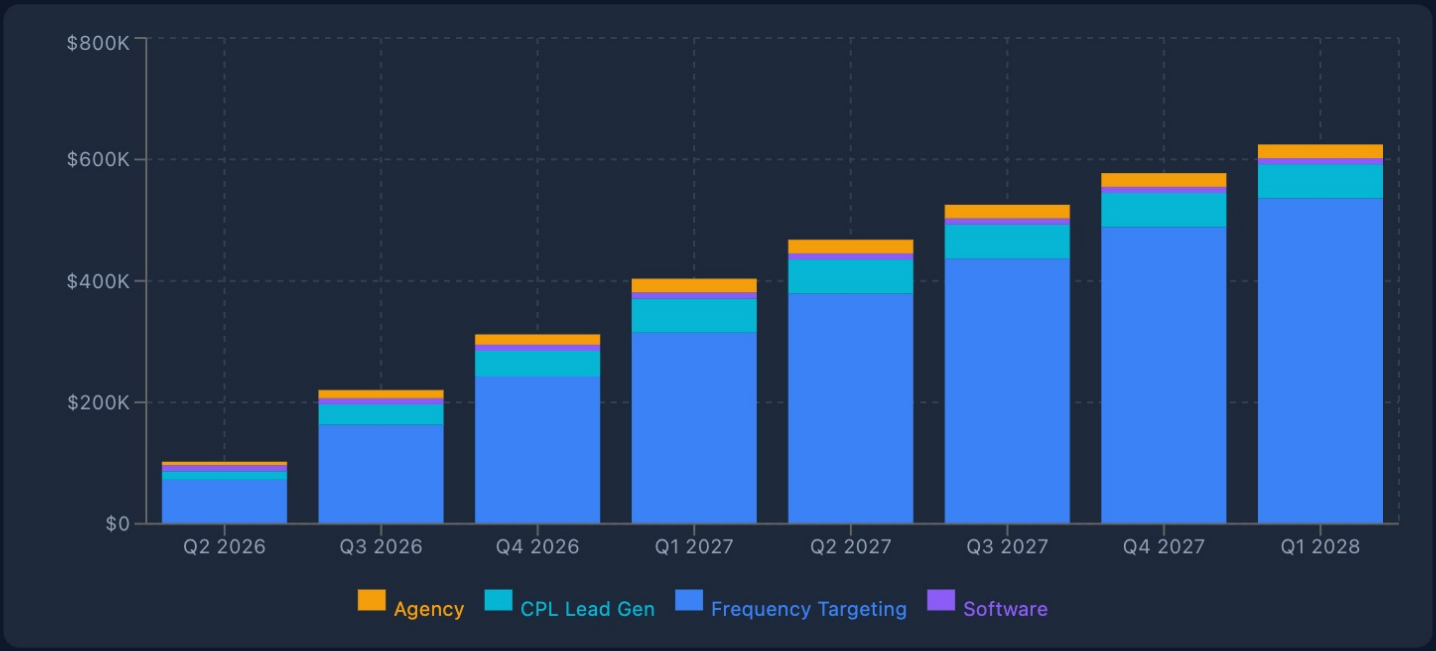


KEY INSIGHT

Investment period: 2 quarters. Sales velocity: 134 days (33 days saved).

BUDGET

QUARTERLY BUDGET BREAKDOWN



CUMULATIVE INVESTMENT VS. REVENUE

BUDGET ALLOCATION

81%	11%	2%	5%
Frequency	CPL	Software	Agency
$2.6M	$371K	$80K	$149K

KEY INSIGHT

The model projects negative ROI (-58%) within the modeled horizon. This is typical for programs under 6 quarters — B2B funnels require sustained investment before returns compound.

COHORTS

COHORT PERFORMANCE

Cohort 1

ABM

12,346 accts → **13.5** deals → **$1.4M** revenue

$233K/deal

KEY INSIGHT

Single cohort (ABM): 12346 accounts producing 13.5 deals at $232,901 per deal.

RECOMMENDATIONS

Pipeline:Marketing ratio (2.8:1) is below the Series A / Seed target of 5:1. Add more accounts or improve conversion rates.

STRATEGNIK

QUARTERLY DATA

FUNNEL METRICS

Quarter	Leads	MQLs	Opps	Won	Pipeline	Revenue
Q2 2026	28	16	0	0.0	$0	$0

FINANCIAL SUMMARY

Quarter	Freq Cost	CPL Cost	Agency	Software	Total Cost	Cum. Cost	Cum. Revenue
Q2 2026	$73K	$14K	$6K	$10K	**$102K**	$102K	$0
Q3 2026	$163K	$34K	$14K	$10K	**$220K**	$323K	$0
Q4 2026	$243K	$42K	$17K	$10K	**$312K**	$634K	$22K
Q1 2027	$315K	$56K	$23K	$10K	**$404K**	$1.0M	$160K
Q2 2027	$379K	$56K	$23K	$10K	**$468K**	$1.5M	$407K
Q3 2027	$437K	$56K	$23K	$10K	**$525K**	$2.0M	$696K
Q4 2027	$489K	$56K	$23K	$10K	**$577K**	$2.6M	$1.0M
Q1 2028	$536K	$56K	$23K	$10K	**$625K**	$3.2M	$1.4M

KEY INSIGHT

Over 8 quarters: 743 leads generated, 13.5 deals closed, with peak revenue of $328,961 in Q4 2027.

METHODOLOGY

MODEL ASSUMPTIONS

- Quarterly velocity distribution: leads are distributed across 4 quarters per cohort using campaign-profile-specific weights (not front-loaded into Q1).
- ASP-linked conversion scaling: conversion rates and sales velocity are automatically adjusted based on average selling price ($100,000).
- Cross-cohort compounding: multiple active cohorts boost Lead→MQL and MQL→Opp by 15% per additional active cohort, phased in over 2 quarters.
- Frequency-conversion coupling: monthly frequency above the profile baseline improves Lead→MQL and MQL→Opp rates (up to +25% at 20 touches/month) and shifts leads earlier in the timeline.
- Quarterly onboarding cap: 750 accounts/quarter. Excess accounts are queued for subsequent quarters.
- Sales velocity improvement: 20% maximum reduction over 4 quarters, reflecting better-qualified pipeline.
- Quarterly dropout rate: 15% of in-progress accounts removed each quarter.

DISCLAIMER

This model uses industry benchmarks and user-provided inputs to generate forward-looking projections. Results are estimates based on assumptions about conversion rates, sales velocity, and budget allocation. Actual results will vary based on execution quality, market conditions, competitive dynamics, and team capacity. This report is not a guarantee of future performance.
